### Remarks:

1. Tubes are pitched toward return connection when installed for horizontal air flow for FL < 120°. Installer must provide pitch on vertical air flow.
2. Mounting holes are optional. 0.375" diameter holes on 6" centers from the centerline of the fin height and finned length are typical for all flanges. Not available with when S < 1.50" or Inverted Flanges.
3. Intermediate tube supports are fabricated from heavy gauge stock and supplied per the chart below.
4. All dimensions are in inches.
5. Connection Location:
   - C = 2.50" ± 0.50"
   - D = 0.125" to 0.5625" above coil center line
   - E = 0.125" to 0.5625" below coil center line
